

# National Information Assurance Partnership Common Criteria Evaluation and Validation Scheme

## **CCEVS Announcement (website)**

29 November 2011

### **“In Evaluation List” Elimination Announcement**

The NIAP CCEVS List of Products and Protection Profiles in Evaluation, better known as the “In Evaluation List” will be eliminated effective 1 August 2012.

The new direction of NIAP requires development of NIAP approved Protection Profiles (PPs) within Technology Communities and requires products to be evaluated for compliance with the NIAP approved PPs. NIAP approved PPs will define a complete set of understandable threats and technology specific functionality. Conformance to NIAP approved PPs will facilitate more consistent and timely evaluations. Because evaluations will complete in a shorter amount of time, this “In Evaluation List” no longer serves its original purpose and will therefore, be eliminated.
