

NIAP CY2023 2nd Quarter Progress

PRODUCT VALIDATIONS

16 evaluations with 236 configurations added to the PCL

EVALUATIONS BY TECHNOLOGY

Network Device (ND)	6
Application Software (APP)	3
Full Drive Encryption (FDE)	2
Mobile Device Fundamentals (MDF)	3
Peripheral Sharing Device (PSD)	1
Mobile Device Management (MDM)	1

STAKEHOLDER ENGAGEMENT

SUPPORTED NSA AT RSA NIAP manned the NSA booth from 24-27 April 2023 on RSA exhibition floor. Spoke with over 100 visitors. Met with Germany, Netherlands and Sweden to discuss common criteria related concerns and impact of cybersecurity legislation.

BRIEFED AT THE PQ CYBER DAY & CSFC CONFERENCE on 15 - 16 May 2023. Discussed with industry security products providers and government integrators of CSFC solutions for use in classified systems. Highlighted in the briefing was the NIAP implementation of CNSA Suite v2.0 with software and firmware signing as the highest priority. NIAP answered multiple questions on CSFC Capability Packages.

HOSTED LAB & VALIDATOR WORKSHOP on 9 May 2023, NIAP hosted their semi-annual workshop meeting with their commercial labs and validators to address submitted topics and plans for the upcoming year impacting commercial technology evaluations. Topics included protection profile update plans, new requirements driven by CNSA2.0 and the new common criteria, improved automation of protection profile development and security targets, along with the new NIAP website launch later this year.

ATTENDED 2023 ENISA C.S. CONFERENCE Sessions attended on 25 May 2023 included panels on "How to translate the EU's Cybersecurity Resilience Act in the EU's Cybersecurity Act requirements", the "Implementation of EU Cybersecurity Certification", etc. NIAP continues to track the impact of the EU Cybersecurity Act and the EU Cyber Resilience Act as they move toward full implementation.

PROTECTION PROFILE (PP) DEVELOPMENT

PP UPDATES IN PROGRESS

- Redaction Tool PP-Module, Version 1.0
- Mobile Device Management Agent PP-Module, Version 1.1
- VPN Gateway Errata
- Post-Quantum Cryptography (multiple PPs)
- Conversion to latest Common Criteria version (multiple PPs)

PPs IN DEVELOPMENT

- Enterprise Management (EM) PP
- Privilege Access Management (PAM) PP
- Software Defined Networking-Controller (SDN) PP

cPPs REVIEWING FOR ENDORSEMENT

- Agent Applications cPP-Module
- Application Software cPP
- Server Applications cPP-Module
- Hard Copy Device cPP
- Network Device cPP v3.0

COMMON CRITERIA RECOGNITION ARRANGEMENT

CCDB CRYPTO WORKING GROUP RELEASED CRYPTO CATALOG FOR REVIEW The Crypto Working Group has completed and released Cryptographic Catalog v1.0 following 2 years of international meetings. This catalog standardizes the list of cryptographic requirements for international PP development and is the first of its kind. It provides needed guidance to Protection Profile (PP) authors, including applicable Security Functional Requirements (SFRs) and how to implement them. The document has been shared with the Common Criteria Development Board (CCDB) and Crypto community for comments. The Working Group will continue to draft Evaluation Activities, that will function as a supporting document to the catalog, while awaiting comments. Once approved by the CCDB, the catalog will be published for use by the CC community.

COLLABORATED WITH CANADA TO PILOT COMMON CRITERIA TRAINING As a result of teaming on a previous audit of the Australian scheme, the US and Canadian delegation negotiated leveraging Canada's rigorous Common Criteria Training Program in a piloted approach to bolster the US Scheme's foundational Common Criteria knowledge set.

PREPARATION FOR CCRA MEETINGS October 25-27 & 30, 2023 in Washington, DC

PREPARATION FOR THE 22nd INTERNATIONAL COMMON CRITERIA CONFERENCE (ICCC) 31 October – 2 November 2023. Metro Center Marriott in Washington, DC
